

WAYFILE

Physical Innovative Solutions

GENERAL DESCRIPTION

The Physical File Solutions **WAYFILE** essentially aim to respond to concrete needs and issues, in accordance with the existing archival classification, specifically:

- ✓ **optimisation** of available space
- ✓ **higher capacity** for files and storage
- ✓ higher **organisational capacity**
- ✓ **preservation and security** of documents and stored items
- ✓ **easy accessibility**
- ✓ **versatility and adaptability** in relation to specific characteristics

SLIDING COMPACT SHELVES

The main advantage of the compact sliding shelf system **WAYFILE** is **improved efficiency of space** compared to fixed shelves that require numerous access corridors.

With a potential for **customisation** in terms of finishes, materials and colours, this system is designed to **minimise wasted space** by creating a single consultation area by moving the shelves next to the access point.

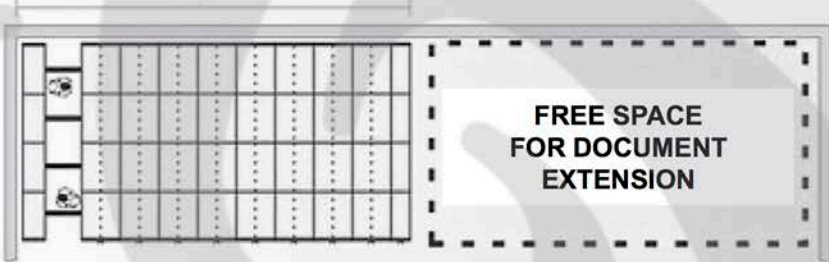

SLIDING COMPACT SHELVES

TRADITIONAL FILING SYSTEM

FILING ON SLIDING SHELVES

Filing on sliding shelves **WAYFILE** allows for **MORE THAN 50%** better use of space compared to traditional filing systems
