

WAYGOV

Government Management Platform

GENERAL DESCRIPTION AND OBJECTIVES

The global dematerialisation solution aims to simplify processes and have an effective control over the circulation of documents and also have structured information between different actors:

G2G (Government to Government)

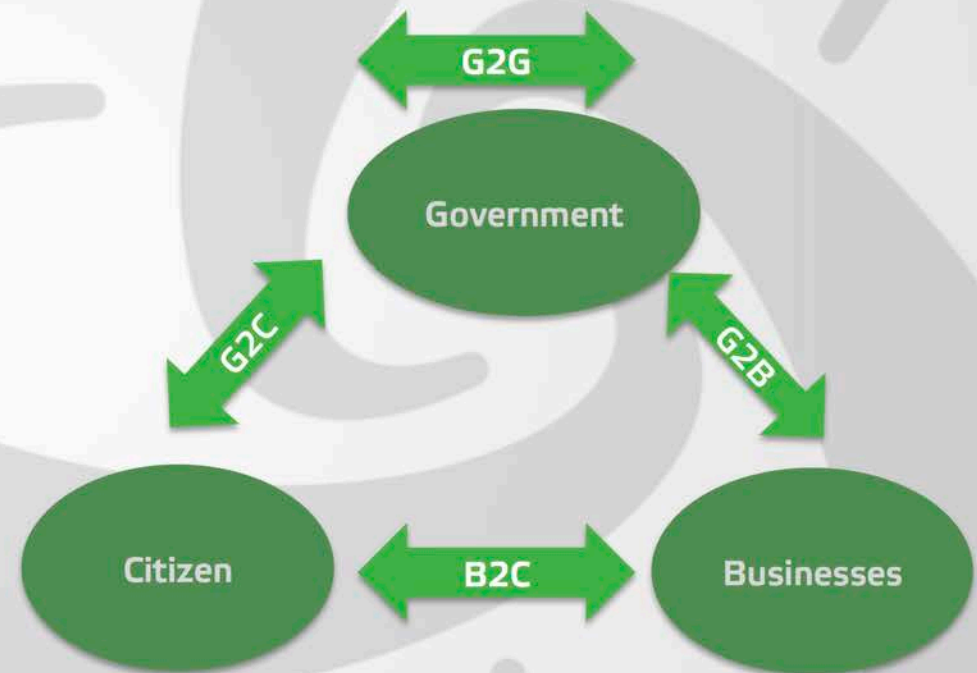

Internal communication of the Government between Ministries, Institutes and Government Departments

G2C (Government to Citizen)

Communication between the Government and the Citizen - providing better services, more information and simplifying citizen relations with Government services

G2B (Government to Business)

Communication of the Government with Businesses, ensuring closer contact through the use of Information Technologies and good electronic communications practices
